Humminbird introduces new LakeMaster regions

JAN 8, 2015
EUFAULA, Ala. – Humminbird is now ready to bring the LakeMaster experience to more anglers across the U.S. than ever before. Our survey team has expanded the High Definition map coverage into the Midatlantic and Northeast regions with new, Version 1 Editions for anglers.

In addition to these two regions, we’ve added a new PLUS version of these products as well. The PLUS series allows for aerial image overlay on High Definition waters in addition to all of the LakeMaster features. Now you have the ability to use quality aerial photography to view the entry and exits of creek channels, see how far a reef or weed line extends, and pick out shallow water rock piles, steep drop-offs or other features of the lake you’ve been missing from traditional maps.

Midatlantic States Edition

• Contours for over 100 total lakes, rivers and reservoirs in Delaware, Maryland, North Carolina, South Carolina, Virginia and West Virginia

• 42 High Definition water bodies, including several sections of the Ohio River

• Updated coastline for the entire region

• i-Pilot® Link™ Compatible

Includes these highly requested water bodies in stunning High Definition: Strom Thurmond, Ga./S.C.; Lake Murray, S.C.; Smith Mountain, Va.; Kerr/Buggs, N.C./Va.;
Gaston, N.C.; Wylie, N.C.; Norman, N.C.; and Shearon Harris, N.C. Also, contours for Chesapeake Bay, Md.; and Delaware Bay, Del.

Visit **MidAtlantic States Edition** for more information on product features, images, complete lake list, lake elevations, GPS compatibility and more.
