**Pre-requisites for Advanced Classes:**  
 1. Student must have taken and passed the basic MEI/NMEA 2000 course  
 2. All students must have at least one year of field experience installing marine electronics before NMEA will issue an AMEI/Advanced NMEA 2000 Certificate.  
 a. If the student already does have this field experience, it needs to be verified in writing by the student's employer.  
 b. If the student does not yet have this field experience (for example they are a new hire, graduate, new to the industry, or apprentice), they will be eligible for their AMEI/Advanced NMEA 2000 Certificate exactly one year from the date of issue on the MEI certificate. Please note that any student can take the AMEI/Advanced NMEA 2000 class and test at any time. As a marine electronics installer, field experience is the best independent teaching tool. This requirement eliminates the possibility of good test takers with no field experience.

**Volume Discounts**  
 -A 20% discount per class will be offered to NMEA member companies who register three or more employees at any one training event.  
 -Single student registrations who register for 2 days: discount is \$75, 3 days: discount is \$150, 4 days: discount is \$225
