Release of Version 2.1 of Nobeltec TimeZero Product Range

We are pleased to announce that Nobeltec has launched Version 2.1 of the Nobeltec TimeZero product range.

This software update includes a number of innovative new functions, that will make marine navigation even more efficient and user-friendly for both recreational and professional boaters. This major update is absolutely free to all current Nobeltec TimeZero customers.

Here are details about some of the most important new functions in Version 2.1:

**New Features in ALL Nobeltec TimeZero Version 2.1 Products**

- **New 3D Bathymetry mode**: The 3D bathymetry exaggeration is now automatically adjusted to provide the best 3D view possible at any scale for any slope, as in the example below:

```
3D Bathymetry: OFF
3D Bathymetry: ON
```

- **Auto Shift (“Look Ahead” mode)**: When the “Centre On” tool is selected, the position of the boat will automatically be moved inside the motion circle based on your speed and your course (COG).

**New Features in Nobeltec TimeZero Trident & Catch**

- **Proudman Currents** are now available for various zones in Europe and the Arabian Gulf.

- **Sounder history has been increased to multiple hours**. The Furuno Sounder Plus Pack is required for this.

- **When integrated with NavNet DRS Dual Range**, TimeZero can access the NavNet DRS Dual Range capability from a new “Dual Radar” WorkSpace (Furuno Radar Plus Pack required).

- **Fleet Tracking Position Report**: TimeZero now automatically creates the Position Report file that can be sent manually or synchronized among multiple vessels using the file hosting service Dropbox. User can choose the frequency of these reports.
New Features in Nobeltec TimeZero Catch only

- The Bathy Recorder function has been completely redesigned - for an even more powerful fishing tool.

- Addition of Manual Contour Lines and new Contour Line Tool. The contour line interval can be adjusted to a fixed step and user can choose a “highlight” contour line depth. See below image:

Many other new features can also be found in the software, as well as miscellaneous functions and bug corrections.

Pricing:
Version 2.1 is a totally free update for all current Nobeltec TimeZero users.
