Visit Actisense at METS 2013

October 16, 2013

It's that time of year again when the Actisense team are preparing for the Marine Equipment Trade Show (METS).

Held at the Amerstdam RAI from 19th to 21st November 2013, METS showcases marine equipment to trade visitors from around the world.

The Actisense team will be on stand 03.128 in the British pavilion and will be very pleased to present the newest Actisense products available, including the Engine Monitoring Unit (EMU-1). Well established in the industry with the reputation as the NMEA specialists, the Actisense team will be available to answer your NMEA interfacing or networking questions. If you would like to arrange a meeting with Actisense at METS, please e-mail Lesley Keets lesley@actisense.com.
