Climate Leadership Award recognizes Cummins’ energy efficiency efforts

For the first-ever Climate Leadership Awards, Cummins was named a recipient for being a corporate leader in reducing its carbon footprint and embedding sustainability into the Company’s culture.

Cummins won the greenhouse gas (GHG) goal achievement category of the Climate Leadership Awards. The Company reduced its GHG emissions by 28 percent from 2005 to 2010 — exceeding its goal of a 25 percent reduction. The Company is now driving for even greater reductions by 2015, and has created a comprehensive path toward that goal.
