Raymarine’s Dragonfly captures a turtle

Reveal the world beneath your boat to win Dragonfly prizes!

May 2013

World leaders in marine electronics, Raymarine, has announced the first lucky winner of its NEW and exciting monthly Dragonfly™ Screen Capture Competition.

Ben Garlick of Queensland, Australia, has won a refund of the full purchase price of his award-winning Dragonfly system, as well as a Dragonfly sun cover and carrying case, by submitting the winning shot for April’s Screen Capture Competition.

His eye catching screen shot captured a bale of turtles swimming beneath his boat in a large, shallow estuary of water off the east coast of Australia.

Dragonfly’s CHIRP DownVison™ sonar technology was able to capture a clear shot of the turtles shortly before they ventured to the surface of the water to
greet Ben and his boat! Ben won the competition by completing an online form found on Raymarine’s website [www.raymarine.eu/dragonfly](http://www.raymarine.eu/dragonfly)

Dragonfly’s innovative and award-winning technology provides two independent channels enabling the ultimate in fish targeting through its CHIRP sonar technology, with amazing photo-like underwater imagery using CHIRP DownVision™.

The Raymarine Dragonfly Screen Capture Competition challenges boaters and anglers to discover the world beneath their boat, sharing their best ‘Dragonfly in action’ screen captures with the world.

Each month Raymarine will choose the best submissions and winners will receive a Dragonfly sun cover and carrying case for any screen capture images published by the company. Additionally, one lucky winner each month will receive a refund of the full purchase price of their Dragonfly system.

Official entry form and details are available at [www.raymarine.eu/dragonfly](http://www.raymarine.eu/dragonfly)

**About Raymarine:**

Raymarine, a world leader in marine electronics, develops and manufactures the most comprehensive range of electronic equipment for the recreational boating and light
commercial marine markets. Designed for high performance and ease of use, the award-winning products are available through a global network of dealers and distributors.

The Raymarine product lines include radar, autopilots, GPS, instruments, fishfinders, communications, and integrated systems. Headquartered in Portsmouth UK, Raymarine is a division of FLIR Systems, a world leader in thermal imaging. For more information about Raymarine please go to www.raymarine.com.

About FLIR Systems:
Pioneers in all aspects of infrared technology, FLIR designs, manufactures, and supports thermal imaging systems and subsystems for industrial, scientific, government, commercial, and firefighting applications. With almost 50-years of history in infrared innovation, over 100,000 systems in use worldwide, and development centres and sales offices in over 60 countries, FLIR is the world leader in thermal imaging technology. Visit the company's website at www.FLIR.com.
