PRESS RELEASE

THRANE & THRANE INTRODUCES GROUND BREAKING NEW MARITIME SATELLITE TV ANTENNA – SAILOR 100 SATELLITE TV – AT SMM 2012

Innovative technology improves satellite TV reception for commercial vessels

Thrane & Thrane – a Cobham plc company – will introduce a new state of the art maritime Satellite TV antenna at SMM 2012. SAILOR 100 Satellite TV offers a number of innovations including multi-polarisation and a programmable LNB to ensure high quality worldwide TV reception.

The SAILOR 100 Satellite TV is designed, developed and manufactured in-house by Thrane & Thrane’s experienced engineers and is the most advanced, rugged and reliable satellite TV antenna ever built. Further innovations include single cable installation, which is a truly unique feature in the maritime satellite TV market, making installations easier and considerably more cost effective.

The SAILOR 100 Satellite TV is designed specifically to meet the demands of maritime professionals, even in the toughest maritime environments. With a 103 cm dish and advanced 3 axis structure, the antenna is the perfect compromise between size and performance. It also features an advanced rotary joint, eliminating the need for cable unwrap when the vessel turns.

SAILOR 100 Satellite TV is designed with simplicity and ease of use in mind. It comes as standard with a powerful touch screen terminal to handle all setup, service and management, and features an advanced but intuitive Graphical User Interface.

Based on the highly-regarded SAILOR 900 VSAT platform, SAILOR 100 Satellite TV offers superior performance because it is designed and tested solely for the maritime environment. Rigorous in-house and at-sea testing ensures that the antenna lives up to the high standards of quality and reliability users have come to expect from all SAILOR equipment.

To learn more about the SAILOR 100 Satellite TV and the Thrane & Thrane range of satellite and radio communication systems, visit the Thrane & Thrane SMM stand #407 in hall B6.

Ends
Sept 2012
