

Capt. Daniel A Harper, Founder & CEO:

Throughout his career, Daniel has successfully applied his lifelong passion for boats, computers, electronics and adventure to various entrepreneurial pursuits. In the mid-nineties, Harper co-founded a pioneering hypertext search software and digital publishing company. Next, he founded World Sail Excursions, a boutique maritime company that specialized in luxury adventure sailing vacations, advanced sail training programs, and custom boat design and construction. Throughout the 2000's Daniel ran classical sailboat racing campaigns and continues to race and cruise his Swan 42, Corban on the waters of New England, the East Coast and Caribbean.

Daniel's years of experience on the water and with new and custom boat construction, coupled with his in-depth knowledge of the boating market, computers, and electronics led to the realization and development of Siren Marine's "Connected Boat®" technology and IoT platform. Since forming Siren Marine in 2011, the company has won numerous awards and have been granted several patents and trademarks, globally: 2012 RI Business Plan Competition, Finalist for Dame Award in 2017, Soundings Trade Only Most Innovative Company 2019, and many more. Throughout the nearly 2 decades of running Siren Marine, Daniel has transformed the company from a concept to a fully operational business and market leader.

As a practitioner of "do what you love". Harper has been fortunate to have had three decades of meaningful careers successfully living that mantra.
