

Icom showcases IC-M323 new VHF/DSC Transceiver at the Southampton Boatshow

September 17, 2012

Icom UK are delighted to have a world exclusive product launch on their stand H021 at the Southampton Boatshow. The IC-M323 VHF/DSC transceiver brings exceptional features at a entry level price.

Available in Black or Super White, the IC-M323 looks identical and has the same revolutionary design as the IC-M423. It also features the same common user interface that has been adopted on the latest Icom radios including intuitive “soft-keys” permitting faster access to radio functions. As a result of simplifying the technical features offered, Icom has managed to reduce the cost to that of other entry level Icom radios. If the customer wants added features such as active noise cancelling, Commandmic/intercom connectivity, PA function and a remote microphone then they should consider the IC-M423.

Ian Lockyer, Marketing Manager of Icom UK said, ‘The IC-M323 DSC/VHF will be a competitively priced transceiver which is compact in size and easy to use. The affordability will make it an ideal purchase for those who want an uncomplicated set.’

At the moment we are unable to confirm a release date or price but we are hopeful it will be available for sale at the London Boatshow.
